Fast moving consumer goods

Green Cargo is recognized for road safety and reduced environmental impact. This has contributed to that a number of major Nordic convenience goods suppliers use Green Cargo as their 3PL partner.

Through high standards and value for money Green Cargo has developed the services in storage, handling and food distribution services that are best suited to the Nordic market. Green Cargo's 3PL product is quality assured through sophisticated audits by existing customers and is certified by QA authorities.

Green Cargo also offers a number of value-added services, of which one is display pallet production for several current customers.

Based on the requirement for short delivery time and competitive pricing, the distribution centre locations optimal to our customers have proved to be Helsingborg, Copenhagen and Norrköping.

Control tower

To increase the availability of information from the logistics flow, Green Cargo provides a web portal where information showing different activities and their status is monitored. In addition, reports presenting different statistical data are available.

The system enables customers and receivers, irrespective of haulier, to monitor and follow up their stock and orders.

The Control Tower increases all parties' possibilities of planning and optimization of utilized resources.

CUSTOMS SERVICE

- Green Cargo offers a secure, fast and efficient customs clearance. It's a complete service for handling of import and export flows to and from all over the world. We create customized solutions which enable significant cost savings for our customers.
- Green Cargo works on-line in the systems of the Swedish and Norwegian customs authorities. We can store the goods in bonded warehouse and distribute to the final recipient without previous customs clearance or any delaying customs procedures at the border.
- Green Cargo holds an AEO certificate (AEOC) issued by the Swedish Customs Service according to the rules of EU.

Pure Performance

Green Cargo holds an ISO 9001, ISO 14001, OHSAS 18001, AEO and Bra Miljöval certificate. The picking accuracy for all our warehouses was 99,93% in average during 2009.
