

Green Cargo Logistics – Electronics

Overall logistic solutions for the Nordic market

Electronics

Fast moving consumer goods

Fashion

Sports and Leisure

Tires

Alcoholic beverages

Books and Media

Construction Companies
and Home Improvement

Electronics

The segment consists both of white goods as well as alarm systems and other electronic products.

Modern automated warehouse equipment is used to create efficient warehousing and picking solutions for components and spare parts.

Parcel, general cargo and part load solutions are combined to ensure a continuous supply of goods to the market.

Green Cargo Logistics uses the leading carriers to provide the best distribution solutions for our customers. A large number of European inbound shipments are carried out using rail solutions.

The main market for the electronic industry is so diverse that we offer our customers storage solutions at all of our locations in the Nordic region.

CUSTOMS SERVICE

- Green Cargo offers a secure, fast and efficient customs clearance. It's a complete service for handling of import and export flows to and from all over the world. We create customized solutions which enable significant cost savings for our customers.
- Green Cargo works on-line in the systems of the Swedish and Norwegian customs authorities. We can store the goods in bonded warehouse and distribute to the final recipient without previous customs clearance or any delaying customs procedures at the border.
- Green Cargo holds an AEO certificate (AEOC) issued by the Swedish Customs Service according to the rules of EU.

Control tower

To increase the availability of information from the logistics flow, Green Cargo provides a web portal where information showing different activities and their status is monitored. In addition, reports presenting different statistical data are available.

The system enables customers and receivers, irrespective of haulier, to monitor and follow up their stock and orders.

The Control Tower increases all parties' possibilities of planning and optimization of utilized resources.

Pure Performance

Green Cargo holds an ISO 9001, ISO 14001, OHSAS 18001, AEO and Bra Miljöval certificate. The picking accuracy for all our warehouses was 99,93% in average during 2009.
