

# Green Cargo Logistics —Fashion

Overall logistic solutions for the Nordic market

## **Fashion**

Fast moving consumer goods

Sports and Leisure

Tires

Alcoholic Beverages

Books and Media

Construction Companies  
and Home Improvement

Electronics

## Fashion

Green Cargo's modern facility in Gothenburg is automated as to storage and sorting as well as to steam tunnel finishing from flat-packed to hanging garment. Our specialist expertise in hanging garments has given us a dominant position, serving the major wholesalers on the Swedish market.

For market-leading companies with high environmental standards Green Cargo is the only 3PL partner who can offer an intermodal transport network which can cope with the fashion industry's demands for lead times to the stores throughout the Nordic.

Our customers benefit from Green Cargo's participation in the European strategic partnership Fashionet. This network consists of 15 well-established transport and logistics companies in 14 countries commissioned to carry out European distribution through cross-border cooperation.

## Control tower

To increase the availability of information from the logistics flow, Green Cargo provides a web portal where information showing different activities and their status is monitored. In addition, reports presenting different statistical data are available.

The system enables customers and receivers, irrespective of haulier, to monitor and follow up their stock and orders.

The Control Tower increases all parties' possibilities of planning and optimization of utilized resources.

## CUSTOMS SERVICE

- Green Cargo offers a secure, fast and efficient customs clearance. It's a complete service for handling of import and export flows to and from all over the world. We create customized solutions which enable significant cost savings for our customers.
- Green Cargo works on-line in the systems of the Swedish and Norwegian customs authorities. We can store the goods in bonded warehouse and distribute to the final recipient without previous customs clearance or any delaying customs procedures at the border.
- Green Cargo holds an AEO certificate (AEOC) issued by the Swedish Customs Service according to the rules of EU.

## Pure Performance

Green Cargo holds an ISO 9001, ISO 14001, OHSAS 18001, AEO and Bra Miljöval certificate. The picking accuracy for all our warehouses was 99,93% in average during 2009.
