Fast moving consumer goods
Sports and Leisure

Tires

The activities are located in Norrköping in a modern warehouse fully adapted to the specific demands on storage and handling of tires.

According to central point analyzes the Norrköping region is the optimal location of a distribution centre supplying the Swedish and the Nordic tire market.

Green Cargo possesses the expertise and the equipment to perform the value adding services required by the clients, e.g. mounting, studding and balancing. The long studding runs are robotized, while short runs are semi-manual.

We obtain high capacity and flexibility by coordinating the different distribution solutions available on the Nordic market.

CUSTOMS SERVICE

- Green Cargo offers a secure, fast and efficient customs clearance. It's a complete service for handling of import and export flows to and from all over the world. We create customized solutions which enable significant cost savings for our customers.
- Green Cargo works on-line in the systems of the Swedish and Norwegian customs authorities. We can store the goods in bonded warehouse and distribute to the final recipient without previous customs clearance or any delaying customs procedures at the border.
- Green Cargo holds an AEO certificate (AEOC) issued by the Swedish Customs Service according to the rules of EU.

Control tower

To increase the availability of information from the logistics flow, Green Cargo provides a web portal where information showing different activities and their status is monitored. In addition, reports presenting different statistical data are available.

The system enables customers and receivers, irrespective of haulier, to monitor and follow up their stock and orders.

The Control Tower increases all parties' possibilities of planning and optimization of utilized resources.

Pure Performance

Green Cargo holds an ISO 9001, ISO 14001, OHSAS 18001, AEO and Bra Miljöval certificate. The picking accuracy for all our warehouses was 99,93% in average during 2009.
