

# WASTE TRANSPORTS

## Many years of experience and expertise in waste transports.

Green Cargo is the largest railway operator for goods in Sweden. We handle large quantities of goods with high frequency both domestically and abroad. We reach most destinations within Sweden and in collaboration with partnering railway operators we reach most locations on the European continent.

Waste transport applies to domestic as well as cross-border transport of different types of waste:

- Non-hazardous waste, green-listed
- Non-hazardous waste, yellow-listed
- Hazardous waste
- Hazardous waste which is also classified as dangerous goods

We have accumulated competence regarding regulations for:

- Domestic waste transport Waste Ordinance (2020:614)
- Transboundary waste transport EC 1013/2006
- Work environment and Environment
- If the goods are also classified as dangerous goods, we handle this in accordance to Carriage of Dangerous Goods by Rail (RID)

Our Logistics Center has extensive knowledge and experience in waste document handling. In several larger locations such as terminals and ports, we collaborate with agents who handle the waste

*We help you develop a transport solution that meets all safety and environmental requirements, and that takes place in accordance with current regulations.*

documents. This is in order to comply with the requirements of the regulations that necessary documents must accompany the transport.

We see waste transport by rail as a fantastic combination of handling waste products with the most climate-smart form of transport.

We see a stable demand for transport of both hazardous and non-hazardous waste. In Sweden, there is a well-established infrastructure for handling waste.

There are many thermal power plants here that require large volumes of household waste for energy production.

Swedish legislation allows the import of hazardous waste for disposal, something that is in demand from many other countries.

### Contact information

If you are already a customer, you contact your account manager for a quote and contract.

As a new customer, you contact our sales department

### Door-to-door logistics solution

We offer you a complete door-to-door logistics solution. Our large domestic network offers a wide spread of transport options combined with our international shuttles and the international networks of our business partners. Our first and last mile service combines rail and road freight into one reliable supply chain.

### All types of freight

We transport all types of freight – steel, forest products, consumer goods, construction material and chemical products as well as industrial and automotive goods in containers and trailers using conventional wagons.

### Sustainable logistics

Sustainable logistics with us includes minimal environmental impact, traffic safety, punctuality and cost-efficiency. For many years, we have been delivering fossil-free freight via electric trains, both on a large and a small scale according to our customers' requirements. Our shipments are carried out with low energy consumption using renewable energy.

### International shuttles

We offer fast international connections with our shuttles: Italy Direct (Malmö – Treviso) 3 days a week, Austria Direct (Malmö – Linz) 3 days a week and Denmark Direct (Malmö – Fredericia) 3 days a week.
