

TERMINAL SERVICES INFORMATION

For our intermodal network, Green Cargo uses combi terminals in cooperation with intermodal terminal operators in Sweden.

The range of services vary, from terminal to terminal, from the handling of intermodal containers, swap-bodies and trailers to/from the train and truck as well as other terminal services such as storage.

Additional services

The terminals offer additional services. These can be arranged directly with the specific terminal or they can be ordered from us at Green Cargo through your contract.

In connection to rail transport, the temporary storage on the day of arrival as well the following day is free of charge.

- Additional handling or longer storage will be charged according our price list.
- Additional handling is always charged when pick-up or drop off is made on another day than the arrival or the departure day.
- A unit that is stored longer than the allotted free time will be automatically charged demurrage, even if the storage has not been ordered.
- Please contact intermodal@greencargo.com for a price list regarding additional services.
- Trailer shunting includes venting, suspension and folding of underrun protection. Some terminals charge an extra fee for this handling. Please double-check this with Green Cargo.
- An ADR fee will be charged, every time a unit with dangerous goods is handled.

Other Services

In the event of extraordinary events beyond normal terminal hours, where you as a customer wish to pick up or drop off units, contact intermodal@greencargo.com
